**Olive Branch High School
Clark County, Ohio**

Section 10
Page 1

Verbal Boundary Description

The Olive Branch High School is located in the southeast corner of a 5.64 acre parcel, along with a tennis court, a c.1900 house, and two utilitarian buildings. The entire property is identified by the Clark County Auditor as parcel number 01005000210001008. See County Auditor's aerial view on page 10, 2. (NOTE: The Auditor's image still indicates the 1929 Olive Branch High School in the middle of the parcel, which was demolished in 2007. The tennis court is now in that location). The nominated boundary includes only the historic Olive Branch High School and excludes all other buildings on the parcel.

The boundary can be delineated by the following: beginning at the point where the eastern property line meets U.S. Route 40 (W. National Road), proceed north along the eastern property line to a point ten feet beyond the north elevation of the Olive Branch High School. And then, proceed directly west to a point fifty feet beyond the west elevation of the Olive Branch High School. And then, proceed directly south to the southern property line, at U.S. Route 40. Proceed east along the southern property line to the beginning point.

Verbal Boundary Justification

Only the historic Olive Branch High School is being nominated to the National Register. The boundary has been drawn to exclude the other buildings on the property, because they do not relate to the historic significance of the 1914 Olive Branch High School. The boundary has been defined to include the remnant section of 1914 fencing, along the eastern property line, and the open space, to the south, that was historically present between the school and the National Road.
